DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because it does not set forth a brief description of the method being claimed, but merely appears to be a generic abstract for a family of patent applications. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Becker.

The method disclosed by Becker includes all the claimed features and in particular includes: displaying a pick to be performed at a workstation 600; initiating the pick with a handheld device 100; performing the pick manually; indicating through the handheld device that the pick is completed (column 7, lines 55-61); displaying another pick on the workstation 600 and on the handheld device 100 (column 7, lines 55-61); and indication that the pick is completed is performed by scanning a predetermined bar code.
